TB DIAH

TUBERCULOSIS DATA, IMPACT ASSESSMENT AND COMMUNICATIONS HUB

Introduction to the TB Data Hub October 13, 2022

Today's Presenters

DR. STEPHANIE MULLEN

TB DIAH Project Director

DANIEL COTHRAN

Senior Technical Advisor and Data Hub Development Lead

Today's Objectives

- I. Introduce the Data Hub and its features
- 2. Answer user questions about the Data Hub and how to use it

Today's Agenda

- I. Welcome & introductions
- 2. TB DIAH & the PBMEF
- 3. Data Hub overview
- 4. Questions & answers
- 5. Wrap up

Housekeeping

Questions will be addressed at the end of the webinar.

The webinar is being recorded and a link to the recording and presentation will be shared with all attendees and registrants tomorrow by a Zoom link and email.

Overview

TB DIAH & the PBMEF

TB DIAH

TUBERCULOSIS DATA, IMPACT ASSESSMENT
AND COMMUNICATIONS HUB

- Part of the Global Accelerator to End TB
- Global, five-year (2018–2023) associate award, \$36M cooperative agreement
- Small team of M&E and TB experts
 working to clarify TB data in way that
 helps USAID monitor its TB investments
 in its TB priority countries
- Helps countries use data to share their story

What Does Our Work Do?

Surveillance (Data)

Result 1: Strengthen the collection, analysis, and use of routine and surveillance TB data

Reporting (Information)

Result 2: Improve performance-based (M&E) frameworks and information gathering processes: tools, methods, and technical guidance to meet user needs

Communications (Knowledge)

Result 3: Strengthen reporting and communication to address knowledge gaps and share methods, tools, and approaches

Together, TB DIAH's interconnected work streams provide a holistic view of a country's TB monitoring, evaluation, and surveillance.

Performance-based M&E Framework (PBMEF)

- Cornerstone of USAID's efforts to ensure effective accountability of investments in TB at global, regional, and country levels and accelerate progress to end the TB epidemic.
- PBMEF provides:
 - ✓ A set of standardized indicators to measure essential TB program outputs and outcomes
 - ✓ Details on the performance of TB programs in specific technical areas (e.g., diagnosis, treatment, TB/HIV, private sector, etc.)
 - ✓ Treatment cascades and patient pathways that are critical to understanding where gaps are and where efforts need to be strengthened
